

PRODUCTS, INC.

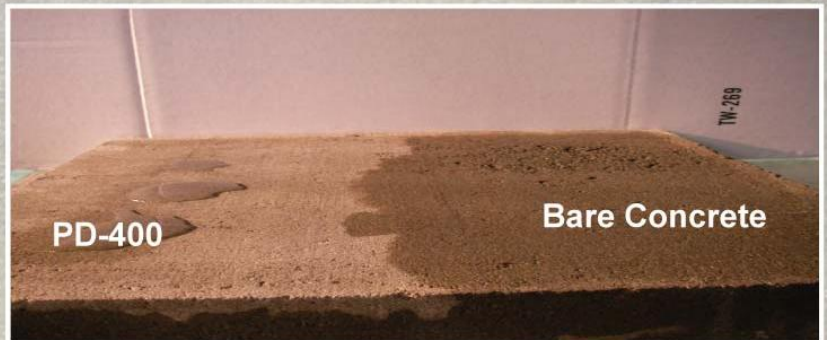

**Pro-Seal PD-400™** is a single component polycarbon/polycarbonate **one-coat penetrating breathable sealer** that completely seals most porous substrates and causes **liquids to bead on the treated surface.**

#### USES

- Brick
- Concrete
- CMU Block Walls
- Split-Faced Block
- Sandstone
- Cinder-Crete

#### ADVANTAGES

- Prevents moisture penetration
- Prevents freeze/thaw damage
- Will not alter color of substrate
- Retards pitting, rusting and dusting
- Resists penetration of many oils, acids, greases and salts
- Enables easier snow and ice removal
- U.V. Impervious
- Long Lasting
- Water resistant seal
- No V.O.C.
