

PRODUCTS, INC.

Pro-Thane 230[™] is a single component polycaron/polycarbonate caulking that is **specifically formulated to seal joints subject to structural movement against water infiltration.** This product may also be used on non-moving joints and require no job-site mixing. Self leveling available upon request.

ADVANTAGES

- No priming necessary
- Cures to tack-free over night
- Maintains low extension modulus after prolonged exposure to harsh elements, reducing cohesive and adhesive failures.

**Non-sagging caulking that cures tack-free over night.
Priming of joints is not required in most applications**

USES

- Tilt-Up Panels
 - Plaza Decks
 - Window Glazing
 - Parking Decks
 - Curtain Wall Panels
 - Moving Joints
 - Non-moving Joints
 - Traffic joints
 - and more
